

1. I consent and authorize Dr. Kelly Koinm to perform the following procedures or operations on

(Patient Name) _____ Procedure _____

I understand that all reasonable care and precautions will be taken in performance of the procedures.

I understand that with any medical procedure, there are risks involved and I accept responsibility for those risks.

**** These service costs are in addition to the surgery cost that will be performed today**

Please Initial Your Choice:

2. General anesthesia has become safer in recent years with the advent of newer drugs and better patient monitoring. Some conditions may not, however, be evident on a physical examination. We recommend a pre-surgical blood profile to ensure that your pet is in a low-risk category prior to this procedure. This profile is similar to tests human physicians require before their patients undergo anesthesia. The results of these tests provide vital information about the functioning of internal organs, specifically the liver and kidneys. All of these systems must be working properly to enable your pet to recover from the anesthesia without complications. This evaluation will also serve as a valuable reference source if your pet becomes ill in the future.

_____ **Pre-surgical Profile and CBC** **Healthy Patients 1-5 Years of Age** **Cost = \$89.00**
 ✎ Evaluates liver & kidney functions, blood sugar levels and metabolic status.

_____ **Comprehensive Panel and CBC** **Patients Over 6 Years of Age** **Cost = \$108.50**
 ✎ Evaluates liver, kidney and pancreatic functions, blood sugar, cholesterol & immune status.
 Able to ID certain types of cancers

_____ I **decline** recommended pre-anesthetic blood work and request that you proceed with anesthesia.

3. PAIN MEDICATION **Min. Cost = \$23**

Pain medication will be used on every surgical case as part of a balanced anesthetic protocol. In addition, post-op pain medication may also be used to keep your pet comfortable.

4 MICROCHIP PET RETRIEVAL SYSTEM

Micro-chipping is a simple, painless method of pet identification. Microchips are rice-shaped computer chips that can be inserted under your pet's skin. These chips contain an identification number that will link you and your pet in the event he/she should become lost. Most United States shelters, and Animal Hospitals are equipped with a scanner that reads your pet's ID number.

Please Initial Your Choice:

_____ I **request** that my pet be Microchipped during the time of his/her hospital stay. **Cost = \$29.99**

_____ I **decline** the Microchip Pet Retrieval System

_____ My pet already has a Microchip

5. I hereby authorize Dr. Kelly Koinm to perform any diagnostic, therapeutic, and surgical procedures as are, in their opinion, necessary and advisable for treatment and maintenance for my pet's health and well-being. I assume full responsibilities for all services rendered. I understand that anesthesia involves risks and hazards in addition to those involved with the recommended surgical, medical, or diagnostic procedure. I do request the use of anesthesia for the relief and protection from pain during the performed procedures. I realize that no guarantee or warranty can ethically or professionally be made regarding the results or cure.
